PERKINS, 1684.

OR,

The Second Part of this

ALMANACK

FOR

The Year of our Lord
God, 1684.

Being the Bissextile, or Leap year, and from
the Worlds Creation, according to Sacred Writ,
5633 years.

Wherein is contained the description of the
four Quarters of the Year: As also a Chrono-
logical Table of many things worth remembrance,
since the Creation, until this present Year, 1683.
Collected for the most part out of Ecclesiastical
History, and other good Authors, something aug-
mented. The like not extant by any other.

By **fr. Perkins**, Well-willer
to the Mathematicks.

L O N D O N,

Printed by **R. Everingham**, for the Company
of Stationers, 1684. *Cum Privilegio.*

A Description of the four Quarters of the Year ; and first of Winter.

Sol in Capricorn, Aquarius, Pisces.

ACCORDING to the custom of Writers in this kind, Winter-quarter is the first quarter, which took beginning the 11 day of December, at which time the Sun enter'd into the first degree of the cold and dry Sign Capricorn, being the most remote from us, in his farthest South Declination, causing the days with us to be shortest, and the nights longest. This quarter continues until the Sun hath slowly passed through Capricorn, Aquarius, and Pisces ; and doth naturally resemble Old Age.

Of the Spring. *Sol in Aries, Taurus, Gemini.*

THIS quarter doth take beginning the 10 of March, at which time the Sun entereth into the first minute of Aries, making equal day and night ; and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter doth resemble Growing Youth.

Of Summer. *Sol in Cancer, Leo, Virgo.*

THE Summer-quarter doth take his beginning when the Sun enters into the first degree of Cancer, which will be this year on the 11 of June ; and continues whilst the Sun passeth through Cancer, Leo, Virgo. Now the days are longest, and the air hottest ; therefore but for necessity, bid Physick adieu.

Of Autumn. *Sol in Libra, Scorpio, Sagitarius.*

AUTUMN, or Harvest-quarter (commonly called the Fall of the Leaf, of some the latter Spring) begins when the Sun enters into the first degree of Libra, again making the day and night of equal length ; which will be this year the 13 of September, and continues whilst the Sun passeth through Libra, Scorpio, and Sagitarius. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.

ADVERTISEMENTS.
